Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 5-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-12 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The term "more or less" in claim 3 is a relative term which renders the claim indefinite. The term "more or less rectilinear" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. "More or less" does not provide a quantitative degree as to how rectilinear the spring devices are.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3731

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Tseng et al (US 6,730,117).

3. Regarding claim 1, Tseng et al disclose the invention substantially as claimed including a self-expanding stent (column 3, lines 5-10) wherein the length remains constant (column 4, lines 9-17; this welding and the connective spine cause the length of the stent to remain constant whether it is expanded or compressed), there are several elastic ring-shaped segments ([12a-d]) linked via connector devices ([11]) that form at least one flange capable of absorbing compressive and tensile stresses.

4. Regarding claims 2 and 3, Tseng et al disclose first and second rectilinear spring devices arranged in an alternating angled manner (column 3, line 47).

5. Regarding claim 4, Tseng et al disclose that the connector devices link either only first spring or second spring devices with each other (figure 1, [11], A-B runs along first spring devices only).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2003/0144729, US 5,707,386, US 6,962,603.
